PROFESSIONAL PROFILE

Junior Fullstack Java Developer with initial experience in designing and implementing scalable, secure, user-oriented web applications. Passionate about performance optimisation, clean code, and collaborative work with agile teams. Knowledge in backend development, including SpringBoot, MySQL relational databases, along with usage of modern frontend frameworks such as Bootstrap with JavaScript.

TECHNICAL SKILLS

HTML5 | CSS3 | Bootstrap | JavaScript | MySQL | Git/GitHub | JAVA | Springboot

SOFT SKILLS

Teamwork | Problem solving | Assertive communication | Critical thinking | Adaptability | Resilience | Proactivity | Leadership | Analytical skills | Emotional intelligence

PROJECTS

E-commerce (Junior Full Stack Developer, collaboration) | KOZMOZ (October 2025 - January 2026)

- I developed a scalable e-commerce website to sell books in both physical and digital formats.
- I used tools such as HTML, CSS (Bootstrap), and JS for frontend development for user experience.
- I implemented REST API (JAVA/Springboot) for the backend, creating and using a relational MySQL database.
- I developed endpoints such as user registration and login, and CRUD operations for users and products.

Personal projects (October 2025 - January 2026)

- I created the frontend interface for a website dedicated to selling music.
- I developed a landing page for a sports store in collaboration with a team using GitHub.
- I developed functional code in Java for a user agenda in collaboration with a team.

ADDITIONAL WORK EXPERIENCE

Professor | Kumon North America (April 2023 - January 2026)

- I tutored students in English from secondary school to university level.
- I managed a digital platform for students, monthly tuition fees, as well as materials and orders.
- I gave private math lessons, from arithmetic to advanced calculus, including university levels.
- I trained new advisory staff.

Independent | Kumon Mexico (July 2024 -August 2024)

- I prepared a budget for internal walls at an educational centre.

Bilingual customer service agent | CCSI (January 2023 - March 2023)

- I served approximately one hundred customers for an American gift shop.

Intern | UNAM Engineering Institute (August 2021 - January 2022)

- I developed programmes in Visual Basic and Excel macros to calculate displacements in glass panels.

EDUCATION

- **Jr. Java Full Stack Developer Bootcamp** | Generation Mexico (October 2025 - January 2026)
- **Civil Engineering** (Graduated, Bachelor's Degree) | National Polytechnic Institute (August 2017 - July 2022)

COURSES

- **Basic and Intermediate Python** | Det y Emp Consultancy (2025)
- **Adaptability and Resilience** | Coursera (2025)

LANGUAGES

- English | C1 (IELTS band 7.0)
- German | A2
